

## Bioscience Industry To Hold Annual October Events

BY INDUNIV RESEARCH CENTER  
& P.R. BIO ALLIANCE

Puerto Rico's bioscience industry is committed to the discovery, development and delivery of innovative medicines, medical devices and healthcare technologies that improve people's quality of life locally and globally. October marks P.R.'s annual celebration of the life sciences with the events of Bioscience Week from Oct. 1-5 and Chemistry Week Oct. 21-26.

The commemoration activities are highlighted by the Opening Ceremony with a Proclamation from the Office of the Governor on Monday, Oct. 1, at Universidad Metropolitana in Cupey, followed by regional activities throughout Puerto Rico the remainder of the week and the Chemistry Festival on Oct. 21.

Industry University Research Center Inc. (Induniv) and the P.R. Bioscience Alliance, in conjunction with our industry members, universities, the American Chemical Society and their P.R. Student Chapters and Chemistry Clubs joined together to make these events possible. For the calendar of activities, visit the Facebook page and websites: [www.facebook.com/](http://www.facebook.com/)

PRBioScienceWeek, [www.biosciencepr.org](http://www.biosciencepr.org) or [www.induniv.org](http://www.induniv.org).

During P.R.'s Bioscience Innovation Week, we are geared toward creating an islandwide annual platform where the bio sector can connect, engage, educate and collaborate. Each university attends to its own student body, invites high-school students and the general public from its region. This bioscience celebration week helps students develop an interest in science and technology, which leads toward the future talents from which P.R. will benefit, and through their contributions support the annual event. For Bioscience Week, Induniv develops educational material, banners, posters and giveaways allusive to the week. We support the universities in their regional activities by supplying all their materials. Bio Week is made possible thanks to the contributions of our industry supporters and the collaboration of our community of partners. Join us at this commemoration with the main events during the week, from Oct. 1-5. Contact us at Induniv to learn how your organization can become a Bioscience Innovation Week supporter or collaborator. Puerto Rico's life sciences industry is committed to making life better for people on our island and around the world.
